

## **FOR IMMEDIATE RELEASE – September 14, 2022**

Introducing the Franke Coffee Systems A400 Fresh Brew:  
Bean-to-Cup Fresh Coffee Every Time

On September 14, 2022, Franke Coffee Systems- Americas, is proud to share the A400 Fresh Brew, the latest innovation in hot coffee. This new system allows for consistent, bean-to-cup, fresh coffee every time, with less waste. The machine has a small footprint of just under 13.5” wide and adjustable stainless-steel feet, that will fit perfect where counter space is limited.

The 8” intuitive touchscreen makes creating a delicious memorable coffee experience easier than ever. This fully automatic machine walks customers through the ordering process in three quick steps with our Advanced User Interface. The unit has two bean hoppers with dedicated grinders to ensure a quality flavor in each drink. With a 9” cup clearance the A400 Fresh Brew can produce up to four sizes of hot coffee. Franke’s patented automatic EasyClean system reduces cleaning time and complexity, while limescale is eliminated easily with an environmentally friendly, integrated and fully automatic descaling system.

Franke Digital Services is available on all our systems and allows for transparency- anytime and anywhere. Get a clear view on commercial and operational performance in areas such as drink sales, cleaning discipline, and stock levels through remote monitoring. The A400 Fresh Brew provides a consistent cup of coffee, without requiring an operator, that will add profits and keep customers coming back. With the quick touch of a button, brewing coffee to order is simple.

The A400 Fresh Brew will be showcased at the National Association of Convenience Stores (NACS) Show, Booth #5436, in Las Vegas from Oct 2-4, 2022. The machine will also be featured in the NACS Cool New Products Preview Room.
